

# FOOD EQUIPMENT

- Mess Kit - Like the Boy Scout type. One for each member of your family. Very compact. Can be used on top of the tin can stove.
- Metal knife, fork, and spoon utensil set.
- Non electric can opener and bottle opener with sharp point.
- Metal folding cook stove and fuel
- Heavy duty aluminum foil for cooking purposes
- Small fishing rod and reel
- Miniature fishing kit - hooks, weights, lures, flies, floaters, spinners, 25 pound test line, swivels, artificial bait, one-sided razor blade, and survival fishing instructions. Available at sporting good stores.
- Dutch Oven
- Plastic drinking cups, re-usable.
- Paper cups and bowls, one time only
- Measuring cups and spoons
- Emergency Tin Can Stove
- Plastic eating utensils
- Plastic bowls
- Paper napkins, paper towels
- Hot pads and gloves
- Wax paper, plastic wrap, zip-loc bags, twist ties
- Pancake turner
- Barbecue fork
- Large spoon and ladle
- Metal grill
- Ice storage chest and re-usable ice packs
- Breadboard and rolling pin
- Several bread loaf pans
- Seed sprouting kit
- Fire safe pots and pans
- Stand for cooking in the fireplace
- Extra grills for cooking. A cooking grill placed over a bed of coals in a wheelbarrow, children's wagon or over a large flowerpot or even an inverted metal garbage can lid will make a satisfactory cooking device.
- Vice
- Griddle
- Pressure cooker

- Long handled fork, spoon, tongs and spatula for turning and stirring food near the fire without getting burned.
- Gas barbecue
- Charcoal
- Fire starters

# FUEL CONSUMPTION

Both burners of a camp stove in use  
 4 hours per day will consume approx. the following amounts of fuel.  
 Use all types of burning fuel only in well ventilated areas.

Period	Fuel Consumed Per 3 meals
Day	5 Pints
Week	3 Gallons
Month	10 Gallons
Year	100 gallons

## Charcoal Briquets:

- When using charcoal in an enclosed space, vent the grill by setting it on the fireplace hearth or placing it near a partially opened window.
- Death could result if space is improperly ventilated.
- Store approx. 25 pounds of briquets per each week's use.
- Store an adequate supply of charcoal starter too.
