We think you can never be too prepared

- ❧ What are the Emergency Preparedness Supplies your family does not want to be caught without? I may be a little obsessive about this, but for me it's toilet paper. My family always has a stash of toilet paper on hand. I look for it on sale and stock up. I buy it in big 48 roll blocks. We have supplies of it under every bathroom counter, in storage under the stairs and in some other places you might not think to look for toilet paper! We will not be caught without it.
- ❧ There are other Emergency Preparedness Supplies that might be important for your family, but not for mine, and there are some items that every family should store in case of emergency – do you have an extra supply of toothpaste or a way to make it? What about extra tarps or tools?

What should you do with The Mega List?

- ❧ Begin your preparations – now! Identify what you might need and stock up on those items as they are on sale. At the end of camping season look for a killer deal on a new Dutch oven. The end of the gardening season is the best time to stock up on seeds and tools. Look over this list and be on the lookout for what your family needs to be self-reliant.
- ❧ These lists are only a guide. They will help you plan for an emergency and enable you to avoid the panic and confusion that challenges most people in times of crisis.
- ❧ You will be confident! You will be prepared!

☞ Where should you start?

- ☞ This program will not be accomplished in in week, month or maybe even a year. Self-reliance is a lifelong pursuit.
- ☞ **GOOD: Choose 5 things** that you are certain you need for your Preparedness Supplies and make a plan to purchase them at a discount. Look at garage sales, sporting goods stores and other closeout sales.
- ☞ **BETTER:** Identify and get together **everything** you think you will need **on one of the Mega Preparedness Supplies lists**
- ☞ **BEST:** You have reviewed each section, identified family needs and have created a purchasing plan with a timeframe.

Where should you start?

"Begin at the beginning," the King said, very gravely, "and go on till you come to the end: then stop."

— Lewis Carroll, Alice in Wonderland

"It does not matter how slowly you go as long as you do not stop."

-Confucius

"You don't have to worry about burning bridges, if you're building your own."

— Kerry E. Wagner

- ❧ There are important questions to ask about each category, not everyone will (or should) need every item on the Mega List.
- ❧ **Do we already have it** stored somewhere? Check it off the list. You may want to make note of where you have it stored.
- ❧ **Do we need it** for our safety or self-reliance? Some items are fun to have but not necessary.
- ❧ **How many do we need**, 1 or 100?
- ❧ **Can I make it** instead of purchasing?
- ❧ **Where will I purchase it?** Can it be found at garage sales or discount stores?
- ❧ **When will I purchase it?** Set a date.

Important Questions to ask as you begin setting your goals

Preparedness goals are ones that will lead you toward your ultimate goal of self-reliance.

You will not achieve all the suggestions I've listed in one year.

Just take it one step at a time. This is not a race, but more like a power walk.

See the post [Setting Preparedness Goals](#) at PreparednessMama

- ❧ **A budget tells your money where to go**
- ❧ And finally - Is it a budget item?
- ❧ You should never go into debt for preparedness purchases.
- ❧ High cost items should be planned and included in your monthly budget.
- ❧ Set aside a specific amount each month for preparedness purchases. Even \$10 makes a difference in the overall plan.
- ❧ Ask your family to purchase items as gifts for Christmas or Birthdays.

First Aid Kit & Medical Supplies

One kit for the house and
one kit for the car

I have several first aid kits around the house. One big one and a few small ones here and there. One for the car and every 72-hour kit has a first aid kit inside.

That might seem like a lot, but you can do this inexpensively by making small kits from items found at the dollar store.

Find out more here:

[DIY Dollar Store First Aid](#)

In order to have a quality first aid kit you need to be able to address more than just scratches and scraps.

A comprehensive first aid kit is also required. Find out more here:

Garden Supplies

Why garden?

- ❧ Growing your own saves money in the food budget.
- ❧ You have control over the chemicals that are added to your food.
- ❧ It is a great way to get inexpensive food for canning, freezing and dehydrating.
- ❧ Children are more likely to eat “unusual” food if they have had a hand in growing it.
- ❧ Gardening is a stress reliever.

Light / Heat / Fuel

Consider this -

How prepared are you for a storm? If the lights are out, having the ability to see and stay warm can make all the difference.

Outdoor Survival & Camping Supplies

Questions to ask

Some families are campers and some are not.

Either way, everyone should acquire the ability to cook a meal outside. Be able use a Dutch oven, and know basic outdoor survival skills.

Pantry Items

Questions to ask

Sometimes my pantry is well stocked and I can open the doors and cook up a masterpiece.

Sometimes I open the doors of my well stocked pantry and think - there's nothing here that sounds good - I just can't think of a way to pull it together into something fresh.

Not only should a stocked pantry give you the ability to bake bread, but a few well placed cans of proteins and vegetables can really make a huge difference.

Paper Goods and Cooking Supplies

Questions to ask

Which of these “behind the scenes” items do you need for self-reliance? These top my list.

- ☞ Canning jars
- ☞ Paper plates
- ☞ My FoodSaver

I use canning jars for all kinds of storage, paper plates – because sometimes you just don’t want to do the dishes, and my FoodSaver makes long term food storage easy.

Sanitation Supplies

Get Prepared

The twin bucket toilet system was used extensively in Christchurch, New Zealand after they had a major earthquake in 2005.

A Twin Bucket Toilet separates pee and poo for better sanitation and disposal. Did you know urine can go in the garden?

Sewing Supplies

Questions to ask

I learned to sew in Home-Ec class when I was a teen.

Sewing is a skill that is not taught to youth these days, but it is a skill that does come in handy when you are in a pinch.

If you learn to patch a hole, darn a sock and sew a simple skirt or bag you are well on your way to self-reliance.

See what [Professor Pincushion](#) offers in free classes and get started!

The Master Spice List

I am a spice-a-holic!

I buy them in bulk and store them by the stove where they can be easily reached. PLUS I have a couple storage shelves of my favorites.

I keep them in canning jars for easy access and I seal them with my FoodSaver attachment so they last a long time.

My personal spice philosophy is this:

- ❧ Season to taste and smell
- ❧ Go bold or go home
- ❧ Know what spices go together
